

# Take Control of Your Workers' Compensation Costs With Experience Mod Analysis.

Realize your company's full potential for cost savings with a complete mod analysis by The Insurance Center. We help our clients understand their mod rating and provide them with ways to significantly save on their workers' compensation premiums. By using your loss history information, we can work together to create a targeted loss control program to decrease your total costs. Contact The Insurance Center today to learn more.

## Discover cost drivers

We expose problem areas and understand the full impact of the mod. We examine loss trends to better understand why your losses happen and how to prevent them. From there, we can help you explore and act on opportunities for improvement.

## Control your costs

By refining our focus, we can develop powerful, customized loss control solutions. We make the most of strategic cost-saving opportunities to improve your workers' compensation program and decrease your costs.

## Stay ahead of your losses

Mod analysis can better prepare you for the future. Increase the accuracy of your cost allocation and risk management decisions. Know what to expect by forecasting for future concerns, like changes in payroll or loss trends.
