

# SAFETY AWARENESS

Brief Topic Safety Refresher Training For Associates

2024

## Safety Glasses

Your eyes are one of the most vulnerable parts of your body, and with all of the possible hazards that exist in the manufacturing industry, it's very important to take the necessary measures to protect them. Eye injuries can be life-changing events. Losing your sight, or even having it limited or lessened, can drastically lower your quality of life and even make you unable to work. With all of that in mind, \*\* takes safety glasses training and proper use extremely seriously.

### The Safeguards of Safety Glasses

Safety glasses are a form of personal protective equipment (PPE) that are designed to protect your eyes from a variety of potential hazards. Regular glasses do not offer the same level of protection and should not be considered a suitable substitute at any time due to their lack of:

- Side shields/side protection
- Impact-resistant lenses, often made of polycarbonate
- Impact-resistant frames

Employees who require corrective vision equipment can be

Name	Signature	Name	Signature
• Use of prescription safety glasses that meet American National Standards Institute (ANSI) standards and also properly correct vision			
• Use of safety glasses that can fit comfortably over regular glasses without disturbing alignment			
<b>When to Wear Safety Glasses</b>			
• Use of safety glasses that can incorporate corrective lenses mounted behind the outer, protective lenses			
In order to be considered safety glasses, the equipment in question must comply with ANSI. You can tell if your safety glasses are up to code by checking for a "Z87" marking			

### Caring for Safety Glasses

Safety glasses are effective equipment, but they are also valuable and, as such, must be maintained carefully. It is important for employees to take good care of safety glasses and other PPE in order to make sure that they remain functional and adequate for providing protection. Follow these tips to keep your safety
