

RISK MANAGEMENT SPECIALIST

Our goal is to help you drive a culture of safety and compliance throughout your workplace. We help you identify and analyze risk, develop loss control procedures, train employees, manage Osha logs, and perform incident investigations. We tailor our proactive solutions to fit your needs and provide peace of mind.

I have been in loss control for over 20+ years and it is a deep passion of mine to help keep businesses safe and compliant with all regulations. I work directly for you and not the insurance carrier.

I look forward to having a conversation with you to see how we can help.

PROACTIVE SOLUTIONS

SAFETY TRAINING AND COMPLIANCE

Develop and documenting compliance programs, creating classroom and hands-on training plans for powered industrial trucks, and establishing machine-specific lockout/tagout procedures with marked energy isolation points, along with ongoing training and inspections.

OSHA COMPLIANCE

We provide guidance through the preparation of an onsite OSHA inspection process and clarify your company's rights within the law to protect yourself effectively.

ONSITE SAFETY SERVICES

Includes mock OSHA audits, full facility and department-specific audits, emergency action plans, job hazard analyses, ergonomic assessments, noise monitoring, and recordkeeping audits to ensure workplace safety and compliance.

FLEET RISK ASSESSMENT

Comprehensive fleet safety solutions, including driver training, vehicle inspections, and policy development, designed to minimize risks and ensure compliance on the road.
